Harnessing the power of biostatistics and real world evidence for cancer treatment, access and care

ABSTRACT: Real world evidence has disrupted the healthcare industry, accelerating drug development and patient access to effective treatments. Flatiron Health is a prominent leader in the collection, curation and analysis of real world data to drive actionable insights to benefit cancer patients. In this talk, we will provide an introduction to Flatiron Health and our quantitative sciences team, showcase the analytical methodologies we employ, and discuss real world examples of our work and impact on cancer patients.
